

 SCD[®] **Equine Plus**
Probiotics**Probiotic Feed Additive for Horses**

Offering a probiotic supplement containing 12 live probiotic species, the beneficial microorganisms in this special blend help promote healthy function in the hindgut¹. Imbalance of gut flora in the hindgut can be caused by stress, competition, transport, surgery, hospitalization, disease, training, unhealthy diet – high-grain, high-starch – or changes in diet. That said, our supplement is recommended daily to assist in maintaining normal levels of gut flora as a preventive measure.

Helps support your horse and foal during¹:

- Stress & Competitions
- High-grain or Changes in Diet
- Transport
- Hospitalization or Stabling
- Diarrhea / Scouring Disease
- Colic
- Gastric Ulcers
- Poor Hoof Health
- Nervous Disorder
- During and After Antibiotic Usage

SCD[®] Equine Plus[™]

Probiotics

Why SCD Probiotics Equine Plus?

Our liquid probiotic for horses in every stage of life provides the daily essentials needed to maintain a healthy horse[†]. Listed below are some of the reasons our probiotic is an industry leader.

- 12 live probiotic species in a palatable liquid that immediately works when entering the hindgut to reduce starch and sugars.
- Survives acidic environment of the hindgut based on simulated gastric pH.
- Not like powders that don't activate until after they are in the hindgut.

SCD Probiotics Equine Plus is fed daily, with each feed, to enhance the digestive process, thus making all nutrients immediately available from your current feed.

Probiotics & Horse Health

Scientific evidence suggests that probiotics can help stabilize the digestive system, reducing the risk of colitis and laminitis[†].

How It Works:

Probiotics

Probiotics play an important role in your horse's digestive system, helping break down protein, starch, calcium, fiber, fats, and sugars.

Symbiotic yeast assists in the digestion of your feed. Too much starch in the diet increases the risk of colic and laminitis. The addition of yeast to the diet may help in managing these problems.
