

# SCD BioAg®

## Bio-Boost Your Soil and Plant Health

Quality soil, rich with living microorganisms and organic matter, is the foundation of your farm. Boost it naturally with SCD Bio Ag, a patented blend of beneficial microbes plus their bio-fermented metabolites.

Introducing this powerful blend to your soil populates plants' root zones with microorganisms and their bioactive compounds which together convert nutrients into more plant-available forms. The result is healthier, more productive soil that actively supports your crops' health and success.

- ✓ Unlocks Phosphorus
- ✓ Increases Plant Resiliency
- ✓ Builds Long-Term Soil Quality
- ✓ Supports Larger, Stronger Roots

MADE  
in the  
USA

All Natural

No Refrigeration

## Quality Ingredients. Patented Growth Method.

SCD Bio Ag contains a powerful community of Lactic Acid Bacteria, *Bacillus spp.*, Purple Non-Sulfur Bacteria, and Yeast. Unlike most companies, we use patented fermentation technology to grow compatible species of beneficial microbes *together*, carefully selecting for and enhancing microbial active functions. Using this patented method, our microbes form a unique synergistic community that is more effective together, as a system, than singularly-grown microorganisms. **Contains** Purified Water, Proprietary Lactic Acid Cultures, Organic Sugar Cane Molasses, Mineral Powder, Sea Salt, Rice Bran Liquid Extract.

## Research-Based. Farmer Tested. Proven Field Results

A 5-year study showed a substantial increase in nutrient availability, with sharply reduced P and K fertilizing, and organic matter content.

**36%**

Increase in Available P

**76%**

Increase in Available K

A 9-month study showed SCD Bio Ag significantly increased microbial biomass and improved soil quality indicators, especially beneficial rhizobia, a type of soil bacteria that fixes nitrogen.

Please use water from non-chlorinated sources, or by pre-treating tap water with dechlorinating agents.

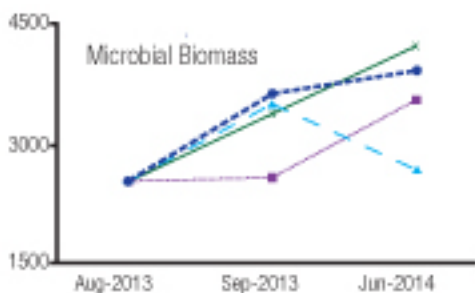

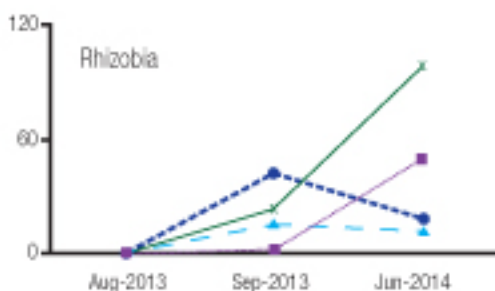

### Applications:

- Soil Additive
- Seed Inoculant/Starter
- Seedling Transplant
- Foliar Feed
- Manure Starter

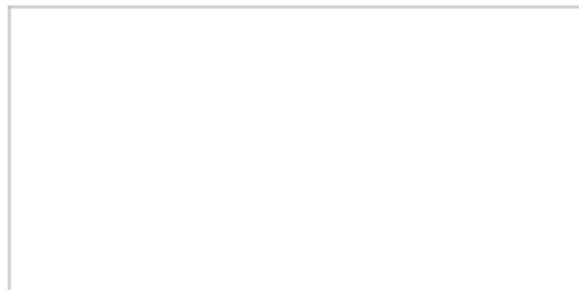

### Available sizes:

5, 55, and 275 Gallons
