

SCD ScentGuard™

Probiotic Odor Control Concentrate

SCD ScentGuard™ is a powerful, probiotics-based solution that stops odor in its tracks. The powerful microbes in our proprietary formula are tough enough to fight against the most potent odors. The reason it's so effective?

Our technology was developed from numerous studies and research on beneficial microorganisms. We took this one step further to create a formula with more than 10 strains of microorganisms that work together to keep foul odors at bay. Because these microorganisms were grown together, in "consortia," they not only co-exist, they are stronger, more resilient, and more effective.

Features:

- Shelf stable; no refrigeration required
- Live, liquid, ready-to-use
- OMRI Listed

Performance:

- Improves overall surrounding air quality
- Controls livestock odors
- Accelerated and long-lasting odor removal
